MATHEMATICAL STATISTICS

VOLUME 5

1977

CONTENTS OF VOLUME 5

ARTICLES AND SHORT COMMUNICATIONS

AHMAD, IBRAHIM A. AND LIN, PI-ERH. Nonparametric estimation of a vector-valued bivariate failure rate 1027–1038

AHSANULLAH, M. A characteristic property of the exponential distribution 580–582

ALVO, MAYER. Bayesian sequential estimation 955–968

ANBAR, DAN. A modified Robbins-Monro procedure approximating the zero of a regression function from below 229–234

ANDERSON, T. W. Estimation for autoregressive moving average models in the time and frequency domains 842–865

ANDREWS, D. F. Discussion of "Do robust estimators work with *real* data?" by Stephen M. Stigler 1078–1079

ARNOLD, STEVEN F. Generalized group testing procedures 1170–1182

BARNARD, GEORGE A. Discussion of "Do robust estimators work with *real* data?" by Stephen M. Stigler 1080–1081

BARR, D. R. AND RICHARDS, F. R. Induced priors in decision problems 182–184

BAŞAR, TAMER. Optimum Fisherian information for multivariate distributions 1240–1244

BERAN, RUDOLF. Estimating a distribution function 400–404

BERAN, RUDOLF. Robust location estimates 431–444

BERAN, RUDOLF. Minimum Hellinger distance estimates for parametric models 445–463

BERGER, J., BOCK, M. E., BROWN, L. D., CASELLA, G. AND GLESER, L. Minimax estimation of a normal mean vector for arbitrary quadratic loss and unknown covariance matrix 763–771

BERGSTRÖM, HARALD AND PURI, MADAN L. Convergence and remainder terms in linear rank statistics 671–680

BERRY, DONALD A. AND YOUNG, D. H. A note on inverse sampling procedures for selecting the best binomial population 235–236

BHATTACHARYYA, G. K., JOHNSON, RICHARD A. AND MEHROTRA, K. G. On the completeness of minimal sufficient statistics with censored observations 547–553

BICKEL, PETER J. Discussion of "Consistent nonparametric regression" by Charles J. Stone 620–621

BJERVE, STEINAR. Error bounds for linear combinations of order statistics 357–369

BLOCK, HENRY W. A characterization of a bivariate exponential distribution 808–812

BOCK, M. E., BROWN, L. D., CASELLA, G., GLESER, L. AND BERGER, J. Minimax estimation of a normal mean vector for arbitrary quadratic loss and unknown covariance matrix 763–771

BONDAR, JAMES V. A conditional confidence principle 881–891
BÖNNER, N. AND KIRSCHNER, H.-P. Note on conditions for weak convergence of von Mises' differentiable statistical functions .. 405–407
BOX, G. E. P. Discussion of "Do robust estimators work with *real* data?" by Stephen M. Stigler 1081–1083
BREIMAN, LEO. Discussion of "Consistent nonparametric regression" by Charles J. Stone 621–622
BRILLINGER, DAVID R. Discussion of "Consistent nonparametric regression" by Charles J. Stone 622–623
BROCKETT, PATRICK L. AND LEVINE, ARNOLD. On a characterization of ridits 1245–1248
BROWN, L. D., CASELLA, G., GLESER, L., BERGER, J. AND BOCK, M. E. Minimax estimation of a normal mean vector for arbitrary quadratic loss and unknown covariance matrix 763–771
BRUNK, H. D. AND PIERCE, DONALD A. Discussion of "Consistent nonparametric regression" by Charles J. Stone 623–625
BUEHLER, ROBERT J. Discussion of "Confidence, posterior probability, and the Buehler example" by D. A. S. Fraser 898
BUTCHER, A. C. An estimator for the spectral density of a stationary time sequence 541–543
CABILIO, PAUL. Sequential estimation in Bernoulli trials 342–356
CARROLL, RAYMOND J. On the uniformity of sequential procedures .. 1039–1046
CASELLA, G., GLESER, L., BERGER, J., BOCK, M. E. AND BROWN, L. D. Minimax estimation of a normal mean vector for arbitrary quadratic loss and unknown covariance matrix 763–771
CHERNOFF, HERMAN. Discussion of "Consistent nonparametric regression" by Charles J. Stone 626–627
COHEN, ARTHUR AND SACKROWITZ, H. B. Hypothesis testing for the common mean and for balanced incomplete blocks designs ... 1195–1211
COLLINS, JOHN R. Upper bounds on asymptotic variances of *M*-estimators of location 646–657
COVER, THOMAS M. Discussion of "Consistent nonparametric regression" by Charles J. Stone 627–628
COX, D. R. Discussion of "Consistent nonparametric regression" by Charles J. Stone 629
COX, D. R. Discussion of "Do robust estimators work with *real* data?" by Stephen M. Stigler 1083
CROW, EDWIN L. Discussion of "Do robust estimators work with *real* data?" by Stephen M. Stigler 1083–1085
DAVID, H. A., O'CONNELL, M. J. AND YANG, S. S. Distribution and expected value of the rank of a concomitant of an order statistic 216–223
DAVIS, KATHRYN BULLOCK. Mean integrated square error properties of density estimates 530–535
DAVIS, WILLIAM W. Robust interval estimation of the innovation variance of an ARMA model 700–708

DAWID, A. P. Further comments on some comments on a paper by Bradley Efron 1249
DEVROYE, LUC P. AND WAGNER, T. J. The strong uniform consistency of nearest neighbor density estimates 536–540
EATON, MORRIS L. AND KARIYA, TAKEAKI. Robust tests for spherical symmetry 206–215
EDDY, WILLIAM F. Discussion of "Consistent nonparametric regression" by Charles J. Stone 629–630
EDDY, W. F. AND HARTIGAN, J. A. Uniform convergence of the empirical distribution function over convex sets 370–374
EISENHART, CHURCHILL. Discussion of "Do robust estimators work with *real* data?" by Stephen M. Stigler 1085–1087
FABIAN, VÁCLAV AND HANNAN, JAMES. On the Cramér-Rao inequality 197–205
FEDERER, WALTER T. On the existence and construction of a complete set of orthogonal $F(4t;2t,2t)$-squares design 561–564
FEUERVERGER, ANDREY AND MUREIKA, ROMAN A. The empirical characteristic function and its applications 88–97
FOODY, WALTER AND HEDAYAT, A. On theory and applications of BIB designs with repeated blocks 932–945
FOUTZ, ROBERT V. AND SRIVASTAVA, R. C. The performance of the likelihood ratio test when the model is incorrect 1183–1194
FRASER, D. A. S. Confidence, posterior probability, and the Buehler example. Discussion by Robert J. Buehler 892–898
GHOSH, MALAY AND MEEDEN, GLEN. Admissibility of linear estimators in the one parameter exponential family 772–778
GILLILAND, DENNIS C. AND HANNAN, JAMES. Improved rates in the empirical Bayes monotone multiple decision problem with MLR family 516–521
GILLILAND, DENNIS C. A note on orthogonal partitions and some well-known structures in design of experiments 565–570
GLESER, L., BERGER, J., BOCK, M. E., BROWN, L. D. AND CASELLA, G. Minimax estimation of a normal mean vector for arbitrary quadratic loss and unknown covariance matrix 763–771
GOEL, PREM K. AND RUBIN, HERMAN. On selecting a subset containing the best population—a Bayesian approach 969–983
GOLDSTEIN, MICHAEL. On contractions of Bayes estimators for exponential family distributions 1235–1239
GOOD, I. J. A new formula for k-statistics 224–228
GORDON, LOUIS AND HUDSON, MALCOLM. A characterization of the von Mises distribution 813–814
GREGORY, GAVIN G. Large sample theory for U-statistics and tests of fit 110–123
GURLAND, JOHN AND LEE, AUSTIN F. S. One-sample t-test when sampling from a mixture of normal distributions 803–807
HABERMAN, SHELBY J. Maximum likelihood estimates in exponential

response models 815–841
HABERMAN, SHELBY J. Product models for frequency tables involving indirect observation 1124–1147
HABERMAN, SHELBY J. Log-linear models and frequency tables with small expected cell counts 1148–1169
HALL, GAINEFORD J., JR. Strongly optimal policies in sequential search with random overlook probabilities 124–135
HALL, W. J. AND LOYNES, R. M. Weak convergence of processes related to likelihood ratios 330–341
HAMPEL, FRANK. Discussion of "Consistent nonparametric regression" by Charles J. Stone 630–631
HANNAN, JAMES AND FABIAN, VÁCLAV. On the Cramér-Rao inequality 197–205
HANNAN, JAMES AND GILLILAND, DENNIS C. Improved rates in the empirical Bayes monotone multiple decision problem with MLR family 516–521
HARTIGAN, J. A. AND EDDY, W. F. Uniform convergence of the empirical distribution function over convex sets 370–374
HEDAYAT, A. AND FOODY, WALTER. On theory and applications of BIB designs with repeated blocks 932–945
HINKELMANN, KLAUS AND NORWOOD, THOMAS E. Estimating the common mean of several normal populations 1047–1050
HOAGLIN, DAVID C. Discussion of "Do robust estimators work with *real* data?" by Stephen M. Stigler 1087–1088
HOEFFDING, WASSILY. Some incomplete and boundedly complete families of distributions 278–291
HOGG, ROBERT V. Discussion of "Do robust estimators work with *real* data?" by Stephen M. Stigler 1088–1090
HOLLANDER, MYLES, PROSCHAN, FRANK AND SETHURAMAN, JAYARAM. Functions decreasing in transposition and their applications in ranking problems 722–733
HOLM, STURE. On a conjecture about the limiting minimal efficiency of sequential tests 375–378
HUBER, PETER J. Discussion of "Do robust estimators work with *real* data?" by Stephen M. Stigler 1090–1091
HUDSON, MALCOLM AND GORDON, LOUIS. A characterization of the von Mises distribution 813–814
HUŠKOVÁ, MARIE. The rate of convergence of simple linear rank statistics under hypothesis and alternatives 658–670
ISAACSON, DEAN AND MEEDEN, GLEN. Approximate behavior of the posterior distribution for a large observation 899–908
JENSEN, D. R. AND MAYER, L. S. Some variational results and their applications in multiple inference 922–931
JOGDEO, KUMAR. Association and probability inequalities 495–504
JOHNSON, RICHARD A., MEHROTRA, K. G. AND BHATTACHARYYA, G. K. On the completeness of minimal sufficient statistics with

censored observations 547–553
JOSHI, V. M. A note on estimators in finite populations 1051–1053
JUREČKOVÁ, JANA. Asymptotic relations of *M*-estimates and *R*-estimates in linear regression model 464–472
KADANE, JOSEPH B. AND SIMON, HERBERT A. Optimal strategies for a class of constrained sequential problems 237–255
KARIYA, TAKEAKI AND EATON, MORRIS L. Robust tests for spherical symmetry 206–215
KARIYA, TAKEAKI. A robustness property of the tests for serial correlation 1212–1220
KELLEY, THOMAS A. Sequential Bayes estimation of the difference between means 379–384
KIMELDORF, GEORGE AND PEELE, LAWRENCE. Prediction functions and mean-estimation functions for a time series 709–721
KIRSCHNER, H.-P. AND BÖNNER, N. Note on conditions for weak convergence of von Mises' differentiable statistical functions 405–407
KLUGMAN, STUART. Discounted and rapid subfair red-and-black ... 734–745
KOUL, HIRA L. Behavior of robust estimators in the regression model with dependent errors 681–699
KOWALCZYK, T. AND PLESZCZYŃSKA, E. Monotonic dependence functions of bivariate distributions 1221–1227
KOZIOL, JAMES A. AND REID, NANCY. On the asymptotic equivalence of two ranking methods for *K*-sample linear rank statistics 1099–1106
LAI, TZE LEUNG. Power-one tests based on sample sums 866–880
LAI, T. L. AND SIEGMUND, D. A nonlinear renewal theory with applications to sequential analysis I 946–954
LAMOTTE, LYNN ROY. A canonical form for the general linear model 787–789
LEE, AUSTIN F. S. AND GURLAND, JOHN. One-sample *t*-test when sampling from a mixture of normal distributions 803–807
LEVIN, BRUCE AND REEDS, JAMES. Compound multinomial likelihood functions are unimodal: proof of a conjecture of I. J. Good .. 79–87
LEVINE, ARNOLD AND BROCKETT, PATRICK L. On a characterization of ridits 1245–1248
LIGGETT, WALTER S., JR. A test for serial correlation in multivariate data 408–413
LIN, PI-ERH AND AHMAD, IBRAHIM A. Nonparametric estimation of a vector-valued bivariate failure rate 1027–1038
LORDEN, GARY. Nearly-optimal sequential tests for finitely many parameter values 1–21
LOYNES, R. M. AND HALL, W. J. Weak convergence of processes related to likelihood ratios 330–341
MAKANI, SHERALI MAVJIBHAI. A paradox in admissibility 544–546
MANOUSSAKIS, E. Repeated sampling with partial replacement of units 795–802

MARITZ, J. S., WU, MARGARET AND STAUDTE, R. G., JR. A location estimator based on a *U*-statistic 779–786
MARONNA, RICARDO A. AND YOHAI, VICTOR J. Asymptotic behavior of least-squares estimates for autoregressive processes with infinite variances 554–560
MAYER, L. S. AND JENSEN, D. R. Some variational results and their applications in multiple inference 922–931
MEEDEN, GLEN AND GHOSH, MALAY. Admissibility of linear estimators in the one parameter exponential family 772–778
MEEDEN, GLEN AND ISAACSON, DEAN. Approximate behavior of the posterior distribution for a large observation 899–908
MEHROTRA, K. G., BHATTACHARYYA, G. K. AND JOHNSON, RICHARD A. On the completeness of minimal sufficient statistics with censored observations 547–553
MENTZ, RAUL PEDRO. Estimation in the first order moving average model based on sample autocorrelation 1250–1257
MEYER, TERRY G. On fixed or scaled radii confidence sets: the fixed sample size case 65–78
MEYER, TERRY G. Bounds for estimation of density functions and their derivatives 136–142
MILLER, DOUGLAS R. A note on independence of multivariate lifetimes in competing risks models 576–579
MILLER, JOHN J. Asymptotic properties of maximum likelihood estimates in the mixed model of the analysis of variance 746–762
MOORE, DAVID S. AND YACKEL, JAMES W. Consistency properties of nearest neighbor density function estimators 143–154

ACKNOWLEDGMENT OF PRIORITY

MOHANTY, S. G. Acknowledgment of priority to "A short proof of Steck's result on two-sample Smirnov statistics" 429

BOOK REVIEWS

DIACONIS, P., OLKIN, I. AND GHURYE, S. G. Review of *Characterization Problems in Mathematical Statistics* (translated from the

Russian by B. Ramachandran) by A. M. Kagan, Yu. V. Linnik and C. Radhakrishna Rao 583–592

GHURYE, S. G., DIACONIS, P. AND OLKIN, I. Review of *Characterization Problems in Mathematical Statistics* (translated from the Russian by B. Ramachandran) by A. M. Kagan, Yu. V. Linnik and C. Radhakrishna Rao 583–592

OLKIN, I., GHURYE, S. G. AND DIACONIS, P. Review of *Characterization Problems in Mathematical Statistics* (translated from the Russian by B. Ramachandran) by A. M. Kagan, Yu. V. Linnik and C. Radhakrishna Rao 583–592

SEDRANSK, J. Review of *Statistical Theory of Sample Survey Design and Analysis* by H. S. Konijn 419–428

CORRECTION NOTES

GHOSH, B. K. AND SEN, P. K. Correction to "Comparison of some bounds in estimation theory" 593

SEN, P. K. AND GHOSH, B. K. Correction to "Comparison of some bounds in estimation theory" 593

For those of you who need to know what's happening in statistics...

The Institute of Mathematical Statistics

and

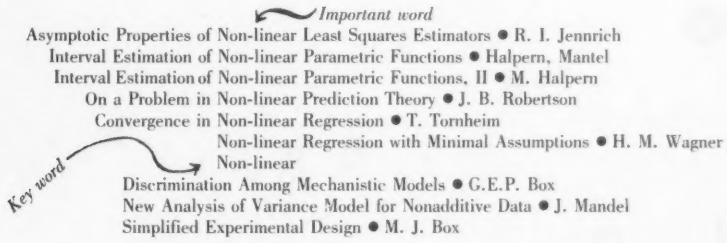
The American Statistical Association

announce publication of Volume Two of

CURRENT INDEX TO STATISTICS: APPLICATIONS, METHODS AND THEORY

An annual computerized index to the statistical literature

Coverage — Over 4,000 articles in "core" and "related" journals for 1976 are indexed. Author index & index by key words. Example of subject index (complete reference to journal, volume, pages, etc., is given):



Important word
Asymptotic Properties of Non-linear Least Squares Estimators • R. I. Jennrich
Interval Estimation of Non-linear Parametric Functions • Halpern, Mantel
Interval Estimation of Non-linear Parametric Functions, II • M. Halpern
On a Problem in Non-linear Prediction Theory • J. B. Robertson
Convergence in Non-linear Regression • T. Tornheim
Non-linear Regression with Minimal Assumptions • H. M. Wagner
Key word
Non-linear
Discrimination Among Mechanistic Models • G.E.P. Box
New Analysis of Variance Model for Nonadditive Data • J. Mandel
Simplified Experimental Design • M. J. Box

Who should subscribe — All individuals who spend any significant fraction of their time doing statistics. Anyone who spends more than *one hour per year* looking for an article on a particular topic in statistics or redeveloping some technique that already exists in the literature will find it cost effective to have a personal copy of this index.

Editor — Brian L. Joiner, University of Wisconsin.

Management Committee — Wilfrid J. Dixon, Chairman; Donna R. Brogan, Robert M. Elashoff, David C. Hoaglin, Donald R. Truax

Subscription Rates — $9.00 for members of the two sponsoring societies

$12.00 for other individuals

$18.00 for organizational/library subscriptions

(Volume One, covering 1975 journals, available at the same rate.)
